

Concrete Hoppers

The self-dumping hopper accessory could automatically activate to both dump and release whenever the bumper release touches the side of a dumpster. When unloading is done, the hopper can go back to original locked and upright position. This particular piece of equipment is even existing with a cable which allows operation from the seat of the lift truck in order to have the alternative of manually dumping the hopper. There is a locking chain provided in order to secure the hopper to the fork truck. This product is made with reliable and consistent robotic welds for utmost strength. The lift truck dumping hopper also has a blue powder coat finish in order to maintain durability.
